

FUNDAMENTAL RESEARCH

biometrics

- 241 Individual Tree Biomass Models to Estimate Forest Biomass for Large Spatial Regions Developed Using Four Pine Species in China
L. Fu, W. Zeng, and S. Tang
- 250 Effects of Measurement Error in Total Tree Height and Upper-Stem Diameter on Stem Volume Prediction
M. Arias-Rodil, U. Diéguez-Aranda, and H.E. Burkhart
- 261 New Variable-Top Merchantable Volume and Weight Equations Derived Directly from Cumulative Relative Profiles for Loblolly Pine
D. Zhao and M. Kane

economics

- 270 Payments for Carbon Sequestration to Alleviate Development Pressure in a Rapidly Urbanizing Region
J.W. Smith, M.A. Dorning, D.A. Shoemaker, A. Méley, L.N. Dupéty, and R.K. Meentemeyer

APPLIED RESEARCH

biometrics

- 283 Site Index Models for Tree Species in the Northeastern United States
J.A. Westfall, M.A. Hatfield, P.A. Sowers, and B.M. O'Connell
- 291 Artificial Neural Network Models: An Alternative Approach for Reliable Aboveground Pine Tree Biomass Prediction
R. Özçelik, M.J. Diamantopoulou, M. Eker, and N. Gürlevik

entomology & pathology

- 303 Interactive Effects of Contact Fungicide and Cold Stratification on the Germination Rate for Five Dominant Temperate Tree Species
B.M. Connelly, L.K. Agnew, and J.L. Orrock

forest management

- 310 Combining 3-Level Multichoice Goal Programming with Multicoefficient Goal Programming to Evaluate Forest Ecosystem Service Potential Improved by Thinning
C. Zheng, C.-T. Chang, and Y.-T. Chen
- 319 Biomass Estimates of Small Diameter Planted and Natural-Origin Loblolly Pines Show Major Departures from the National Biomass Estimator Equations
J. Schuler, D.C. Bragg, and K. McElligott

harvesting & operations

- 331 Foresters' Perceptions of the Frequency, Cost, and Rationale for Seasonal Timber Harvesting Restrictions in Wisconsin 
J.L. Conrad IV, M.C. Demchik, M.M. Vokoun, A.M. Evans, and M.P. Lynch

wildlife management

- 342 Effects of Repeated Burning on Snag Abundance in Shortleaf Pine Woodlands
R.W. Perry, P.N. Jordan, and V.L. McDaniel
