## 7th International Conference on Disturbance Dynamics in Boreal Forests

## 7<sup>e</sup> conférence internationale sur la dynamique des perturbations dans les forêts boréales

Herbert Morin

v

Introduction

REVIEW

SYNTHÈSE

Timo Kuuluvainen and Russell Grenfell

1185–1203

Natural disturbance emulation in boreal forest ecosystem management — theories, strategies, and a comparison with conventional even-aged management

ARTICLES

ARTICLES

Sergio Rossi, Adam Bordeleau,  
Daniel Houle, and Hubert Morin

1204–1212

Effect of chronic ammonium nitrate addition on the ectomycorrhizal community in a black spruce stand

Marc-André Villard, Émilie D'Astous,  
Samuel Haché, Jean-François Poulin, and  
Stéphane Thériault

1213–1219

Do we create ecological traps when trying to emulate natural disturbances? A test on songbirds of the northern hardwood forest

Cornelia Krause, Boris Luszczynski,  
Hubert Morin, Sergio Rossi, and  
Pierre-Y. Plourde

1220–1227

Timing of growth reductions in black spruce stem and branches during the 1970s spruce budworm outbreak

Anne C.S. McIntosh,  
S. Ellen Macdonald, and  
Michael J. Gundale

1228–1238

Tree species versus regional controls on ecosystem properties and processes: an example using introduced *Pinus contorta* in Swedish boreal forests

*Continued on inside back cover / Suite au verso*

**Front cover:** Photo of a young red spruce seedling (*Picea rubens* Sarg.) in a Quebec mixedwood forest by Daniel Dumais.

**Page couverture :** Photo d'un jeune semis d'épinette rouge (*Picea rubens* Sarg.) en forêt mixte au Québec par Daniel Dumais.

<b>Andreas Schmiedinger, Juergen Kreyling, Manuel J. Steinbauer, S. Ellen Macdonald, Anke Jentsch, and Carl Beierkuhnlein</b>	<b>1239–1252</b>	A continental comparison indicates long-term effects of forest management on understory diversity in coniferous forests
