International Symposium on Dynamics and Ecological Services of Deadwood in Forest Ecosystems

Suzanne Brais and Louis Imbeau	v	Introduction
	REVIEW	SYNTHÈSE
Christophe Bouget, Aurore Lassauce, and Mats Jonsell	1421–1432	Effects of fuelwood harvesting on biodiversity — a review focused on the situation in Europe
	ARTICLES	ARTICLES
Laurent Larrieu and Alain Cabanettes	1433–1445	Species, live status, and diameter are important tree features for diversity and abundance of tree microhabitats in subnatural montane beech–fir forests
Emilie Robert, Suzanne Brais, Brian D. Harvey, and David Greene	1446–1455	Seedling establishment and survival on decaying logs in boreal mixedwood stands following a mast year
Suzanne Brais and Pascal Drouin	1456–1466	Interactions between deadwood and soil characteristics in a natural boreal trembling aspen – jack pine stand
Julie Arseneault, Nicole J. Fenton, and Yves Bergeron	1467–1476	Effects of variable canopy retention harvest on epixylic bryophytes in boreal black spruce – feathermoss forests
Jenna M. Jacobs and Timothy T. Work	1477–1490	Linking deadwood-associated beetles and fungi with wood decomposition rates in managed black spruce forests
Philippe Deuffic and Sandrine Lyser	1491–1502	Biodiversity or bioenergy: is deadwood conservation an environmental issue for French forest owners?

Continued on inside back cover / Suite au verso

Front cover: Photo of a young red spruce seedling (*Picea rubens* Sarg.) in a Quebec mixedwood forest by Daniel Dumais.

Page couverture : Photo d'un jeune semis d'épinette rouge (*Picea rubens* Sarg.) en forêt mixte au Québec par Daniel Dumais.

REGULAR PAPERS	ARTICLES ORDINAIRES
RAPID COMMUNICATION	
Andrew J. Larson, Kyle C. Stover, and Christopher R. Keyes	1505–1517
Effects of restoration thinning on spatial heterogeneity in mixed-conifer forest	
ARTICLES	
Patrick Lenz, Michèle Bernier-Cardou, John MacKay, and Jean Beaulieu	1518–1529
Can wood properties be predicted from the morphological traits of a tree? A canonical correlation study of plantation-grown white spruce	
N. Darychuk, B.J. Hawkins, and M. Stoehr	1530–1541
Trade-offs between growth and cold and drought hardiness in submaritime Douglas-fir	
Sara R. Tanis and Deborah G. McCullough	1542–1550
Differential persistence of blue ash and white ash following emerald ash borer invasion	
D.L. Letang and W.J. de Groot	1551–1565
Forest floor depths and fuel loads in upland Canadian forests	
Derek Joseph Lawrence, N. Luckai, W.L. Meyer, C. Shahi, A.J. Fazekas, P. Kesanakurti, and S. Newmaster	1566–1576
Distribution of white spruce lateral fine roots as affected by the presence of trembling aspen: root mapping using simple sequence repeat DNA profiling	
Geoffrey M. Downes, Christopher E. Harwood, John Wiedemann, Nick Ebdon, Helen Bond, and Roger Meder	1577–1586
Radial variation in Kraft pulp yield and cellulose content in <i>Eucalyptus globulus</i> wood across three contrasting sites predicted by near infrared spectroscopy	
Thomas R. Rambo	1587–1596
Association of the arboreal forage lichen <i>Bryoria fremontii</i> with <i>Abies magnifica</i> in the Sierra Nevada, California	
Ruth D. Yanai, Mary A. Arthur, Marty Acker, Carrie R. Levine, and Byung Bae Park	1597–1610
Variation in mass and nutrient concentration of leaf litter across years and sites in a northern hardwood forest	
Angela M. Reid, Kevin M. Robertson, and Tracy L. Hmielowski	1611–1622
Predicting litter and live herb fuel consumption during prescribed fires in native and old-field upland pine communities of the southeastern United States	
Koichi Takahashi and Aya Goto	1623–1630
Morphological and physiological responses of beech and oak seedlings to canopy conditions: why does beech dominate the understory of unmanaged oak fuelwood stands?	
Wesley G. Page, Michael J. Jenkins, and Justin B. Runyon	1631–1647
Mountain pine beetle attack alters the chemistry and flammability of lodgepole pine foliage
