REVIEWED ARTICLES

- 76 **Field and Laboratory Decay Evaluations of Wood-Plastic Composites** by Rebecca E. Ibach, Marek Gnatowski, and Grace Sun
- 88 **[Technical Note] Fumigant Treatment of Douglas-Fir Bridge Timbers** by Jeffrey J. Morrell, Connie S. Love, and Camille Freitag
- 91 **Decay Hazard (Scheffer) Index Values in Korea for Exterior Aboveground Wood** by Taegyun Kim and Jong-Bum Ra
- 95 **Improved Coating Performance on Wood Treated with Carbon-Based Preservatives and an Ultraviolet/Visible Light Protective Precoat** by Rod Stirling and Paul I. Morris
- 101 **Determining an Optimum Model for the Bending of *Eucalyptus regnans* Wood Heated by Microwave Energy** by Colin Burvill, Barbara Ozarska, and Luke Juniper
- 112 **Selecting Eucalyptus Clones Using Ultrasound Test on Standing Trees** by Raquel Gonçalves, Fernando Augusto Franco Batista, and Rafael Gustavo Mansini Lorensani
- 119 **Effect of In-Woods Storage of Unprocessed Logging Residue on Biomass Feedstock Quality** by Yingqian Lin and Fei Pan
- 125 **[Technical Note] Do You Always Adjust Test Results to 12 Percent Moisture Content? No!** by David W. Patterson and Jonathan I. Hartley
- 128 **Physical and Mechanical Properties of Loblolly and Slash Pine Wood from Uruguayan Plantations** by Laura Moya, María F. Laguarda, Matías Cagno, Andrea Cardoso, Francisco Gatto, and Hugo O'Neill
- 138 **Protein Modifiers Generally Provide Limited Improvement in Wood Bond Strength of Soy Flour Adhesives** by Charles R. Frihart and Linda Lorenz
