

FOREST SCIENCE

August 2011

Volume 57, Number 4

- 265 A Parsimonious Dynamic Stand Model for Interior Spruce in British Columbia
O. García
- 281 The Effects of Road Quality and Other Factors on Water-Based Recreation Demand in Northern Ontario, Canada
L.M. Hunt and A. Dyck
- 292 Evaluating Tree Species Spatial Diversity Based on Neighborhood Relationships
G. Hui, X. Zhao, Z. Zhao, and K. von Gadow
- 301 Testing for Nonlinear Spatial Integration in Roundwood Markets
K. Niquidet and B. Manley
- 309 Canopy Structure in a 650-Year Douglas-Fir Chronosequence in Western Washington: Distribution of Canopy Elements and Open Space
R.J. Dial, N.M. Nadkarni, and C.D. Jewell III
- 320 Spatiotemporal Relationships between Climate and Whitebark Pine Mortality in the Greater Yellowstone Ecosystem
J.T. Jewett, R.L. Lawrence, L.A. Marshall, P.E. Gessler, S.L. Powell, and S.L. Savage
- 336 Spatial Optimization of Wildlife Populations with Probabilistic Habitat Connections
A. Billionnet
- 343 Kernel Regression of Directional Data with Application to Wind and Wildfire Data in Los Angeles County, California
H. Xu, K. Nichols, and F.P. Schoenberg
- NOTE
- 353 On Relative Maxima of Diameter Growth, Basal Area Growth, Volume Growth, and Mean Annual Increment for Individual Trees
T.B. Lynch and D. Zhang
