

FOREST SCIENCE

February 2013

Volume 59, Number 1

- 1 Biases in Volume Increment Estimates Derived from Successive Angle Count Sampling
C.S. Eastaugh and H. Hasenauer
- 15 Modeling the Long-Term Impacts of Logging on Genetic Diversity and Demography of *Hymenaea courbaril*
A.E.B. de Lacerda, E.R. Nimmo, and A.M. Sebbenn
- 27 Individual Tree-Based Diameter Growth Model of Slash Pine in Florida Using Nonlinear Mixed Modeling
N. Timilsina and C.L. Staudhammer
- 38 Regional Patterns of Major Nonnative Invasive Plants and Associated Factors in Upper Midwest Forests
Z. Fan, W.K. Moser, M.H. Hansen, and M.D. Nelson
- 50 Allometry Varies among 6-Year-Old *Pinus taeda* (L.) Clones in the Virginia Piedmont
J.P. Stovall, T.R. Fox, and J.R. Seiler
- 63 A Risk-Based Approach to Wildland Fire Budgetary Planning
M.P. Thompson, D.E. Calkin, M.A. Finney, K.M. Gebert, and M.S. Hand
- 78 Comparing Measured Duff Moisture with a Water Budget Model and the Duff and Drought Codes of the Canadian Fire Weather Index
E.A. Johnson, D.M. Keith, and Y.E. Martin
- 93 Assessing the Inflation Hedging Ability of Timberland Assets in the United States
Y. Wan, B. Mei, M.L. Clutter, and J.P. Siry
- 105 A Simulation and Stochastic Integer Programming Approach to Wildfire Initial Attack Planning
L. Ntaimo, J.A. Gallego-Arrubla, J. Gan, C. Stripling, J. Young, and T. Spencer
- 118 Response of Tree Recruitment to Climatic Variability in the Alpine Treeline Ecotone of the Qilian Mountains, Northwestern China
Z. He, W. Zhao, L. Zhang, and H. Liu
