

# FOREST SCIENCE

June 2013

Volume 59, Number 3

- 253 Considering Spatial Correlations Between Binary Response Variables in Forestry:  
An Example Applied to Tree Harvest Modeling  
*M. Fortin, S. Delisle-Boulianne, and D. Pothier*
- 261 Deadwood Density of Five Boreal Tree Species in Relation to Field-Assigned  
Decay Class  
*M. Seedre, A.R. Taylor, H.Y.H. Chen, and K. Jögiste*
- 267 Modeling Height Development of Loblolly Pine Genetic Varieties  
*C.O. Sabatia and H.E. Burkhart*
- 278 Height and Diameter Relationships and Distributions in Loblolly Pine Stands of  
Enhanced Genetic Material  
*C.O. Sabatia and H.E. Burkhart*
- 290 Species-Specific and Ontogeny-Related Stem Allometry of European Forest Trees:  
Evidence from Extensive Stem Analyses  
*H. Pretzsch, E. Dauber, and P. Biber*
- 303 Testing the Design Variables of ECOSEL: A Market Mechanism for Forest  
Ecosystem Services  
*S.S. Rabotyagov, S.F. Tóth, and G.J. Ettl*
- 322 A Meta-Analysis of the Fire-Oak Hypothesis: Does Prescribed Burning Promote Oak  
Reproduction in Eastern North America?  
*P.H. Brose, D.C. Dey, R.J. Phillips, and T.A. Waldrop*
- 335 A Simple Stand Growth Model Based on Canopy Dynamics and Biomechanics  
*T.J. Dean, M. Jerez, and Q.V. Cao*
- 345 Volume and Error Variance Estimation Using Integrated Stem Taper Models  
*M. Fortin, R. Schneider, and J.-P. Saucier*
- 359 Matrix Model of Forest Dynamics: An Overview and Outlook  
*J. Liang and N. Picard*
