

Forestry

VOLUME 84 NUMBER 1 2011

- A comparison of physiological, morphological and growth responses of 13 hybrid poplar clones to flooding
X.-Y. Guo, Z.-Y. Huang, A.-C. Xu and X.-S. Zhang 1
- The physiological basis for regeneration response to variable retention harvest treatments in three pine species
M. D. Powers, K. S. Pregitzer, B. J. Palik and C. R. Webster 13
- Different plot selection strategies for field training data in ALS-assisted forest inventory
M. Maltamo, O. M. Bollandssås, E. Næsset, T. Gobakken and P. Packalén 23
- Non-destructive assessment of internal decay in three hardwood species of northeastern North America using sonic and electrical impedance tomography
N. J. Brazee, R. E. Marra, L. Göcke and P. Van Wassenaeer 33
- Belowground biomass functions and expansion factors in high elevation Norway spruce
B. Konôpka, J. Pajtik, V. Šebeň and M. Lukac 41
- Taper functions for Scots pine (*Pinus sylvestris* L.) and Sitka spruce (*Picea sitchensis* (Bong.) Carr.) in Northern Britain
J. Fonweban, B. Gardiner, E. Macdonald and D. Auty 49
- Life history strategies of aspen (*Populus tremula* L.) and browsing effects: a literature review
T. Myking, F. Böhler, G. Austrheim and E. J. Solberg 61
- Increased drought reduces acorn production in *Quercus ilex* coppices: thinning mitigates this effect but only in the short term
B. Sánchez-Humanes and J. M. Espelta 73
- Resistance of Sitka spruce (*Picea sitchensis* (Bong.) Carr.) to white pine weevil (*Pissodes strobi* Peck): characterizing the bark defence mechanisms of resistant populations
J. N. King, R. I. Alfaro, M. G. Lopez and L. Van Akker 83
- Editor's Note 92
