

# Forestry

VOLUME 85 NUMBER 5 2012

## Original articles

- The relationship between available area efficiency and area exploitation index in an even-aged coast redwood (*Sequoia sempervirens*) stand  
*M. Gspaltl, H. Sterba and K.L. O'hara* 567
- Effect of climate on lodgepole pine stem taper in British Columbia, Canada  
*G. Nigh and W. Smith* 579
- Nursery performance of American and Chinese chestnuts and backcross generations in commercial tree nurseries  
*S.L. Clark, S.E. Schlarbaum, A.M. Saxton and F.V. Hebard* 589
- Determining stem biomass of *Pinus massoniana* L. through variations in basic density  
*L. Zhang, X. Deng, X.D. Lei, W. Xiang, C. Peng, P. Lei and W. Yan* 601
- Relationship between above-ground biomass allocation and stand density index in *Populus × euramericana* stands  
*L. Xue, D.F. Jacobs, S. Zeng, Z. Yang, S. Guo and B. Liu* 611
- Abstracted models for assessing reforestation stocking in spruce–aspen mixedwoods  
*C. Farnden* 621
- Efficacy of hot water treatment to reduce the incidence of *Fusarium circinatum* on *Pinus radiata* seeds  
*C. Agustí-Brisach, A. Pérez-Sierra, J. Armengol, J. García-Jiménez and M. Berbegal* 629
