Cover Photo/Photo couverture : Convection column associated with the major, wind-driven run of the Dogrib Fire taken at around 1600 h on October 16, 2001 from the Ya Ha Tinda Ranch in southwestern Alberta. See related article by Alexander and Cruz beginning on page 370/Colonne de convection associée à une poussée majeure sous l'action du vent, lors de l'incendie de Dogrib, photographiée à environ 1600 h, le 16 octobre 2001 à partir du ranch Ya Ha Tinda dans l'ouest de l'Alberta. Voir l'article d'Alexander Cruz à ce sujet à la page 370. Photo: Andy Gesner, Alberta Sustainable Resource Development.

Multi-cohort Forest Management/ Aménagement forestier multi-cohortes

Multi-cohort stand structure in boreal forests of northeastern Ontario: Relationships with forest age, disturbance history, and deadwood features <i>Ben Kuttner, Jay R. Malcolm and Sandy M. Smith</i>	290
Historical analysis of landscape change in the eastern boreal mixedwood: A case study in the context of cohort-based management <i>Charles Latrémouille, Osvaldo Valeria and Brian D. Harvey</i>	304
Challenges and implications of incorporating multi-cohort management in northeastern Ontario, Canada: A case study <i>David A. Etheridge and Gordon J. Kayahara</i>	315
Multi-cohort stand structure as a coarse filter of variation in mixedwood boreal bird communities <i>Mike V.A. Burrell, Jay R. Malcolm and Pierre Drapeau</i>	327
Do partial cuts create forest complexity? A new approach to measuring the complexity of forest patterns using photographs and the mean information gain <i>Isabelle Witté, Daniel Kneeshaw and Christian Messier</i>	340

Lessons learned from 12 years of ecological research on partial cuts in black spruce forests of northwestern Québec <i>Nicole J. Fenton, Louis Imbeau, Timothy Work, Jenna Jacobs, Hervé Bescond, Pierre Drapeau and Yves Bergeron</i>	350
---	-----

Partial cutting in old-growth boreal stands: An integrated experiment <i>Jean-Claude Ruel, Daniel Fortin and David Pothier</i>	360
---	-----

Scientific and Technical Papers/ Articles scientifiques et techniques

Limitations on the accuracy of model predictions of wildland fire behaviour: A state-of-the-knowledge overview <i>Martin E. Alexander and Miguel G. Cruz</i>	370
Tree species selection revisited for plantations in the Interior Cedar Hemlock zone of southern British Columbia <i>Alan Vyse, Michelle R. Cleary and Ian R. Cameron</i>	382
White spruce (<i>Picea glauca</i>) restoration in temperate mixedwood stands using patch-cuts and enrichment planting <i>François Hébert, Vincent Roy, Isabelle Auger and Martin-Michel Gauthier</i>	392
