|   | ARTICLES  | ARTICLES   |
|---|-----------|--|
| C. Eiry Spence and David A. MacLean   | 1759–1770 | Regeneration and stand development following a spruce budworm outbreak, spruce budworm inspired harvest, and salvage harvest   |
| Alvaro Fuentealba and Éric Bauce  | 1771–1783 | Soil drainage class, host tree species, and thinning influence host tree resistance to the spruce budworm  |
| Douglas N. Kastendick, Eric K. Zenner,<br>Brian J. Palik, Randall K. Kolka, and<br>Charles R. Blinn | 1784–1791 | Effects of harvesting on nitrogen and phosphorus availability in riparian management zone soils in Minnesota, USA  |
| Timothy J. Fahey, Kayla R. Jacobs, and<br>Ruth E. Sherman   | 1792–1795 | Fine root turnover in sugar maple estimated by <sup>13</sup> C isotope labeling  |
| Sylvie Tremblay, Rock Ouimet,<br>Daniel Houle, and Louis Duchesne                                   | 1796–1809 | Base cation distribution and requirement of three common forest ecosystems in eastern Canada based on site-specific and general allometric equations   |
| Lindsey E. Rustad and John L. Campbell  | 1810–1818 | A novel ice storm manipulation experiment in a northern hardwood forest  |
| Oscar Santamaría, Denise R. Smith, and<br>Glen R. Stanosz   | 1819–1826 | Interaction between <i>Diplodia pinea</i> or <i>Diplodia scrobiculata</i> and fungal endophytes isolated from pine shoots  |
| Daniel Charbonneau, François Lorenzetti,<br>Frédéric Doyon, and Yves Mauffette                      | 1827–1836 | The influence of stand and landscape characteristics on forest tent caterpillar ( <i>Malacosoma disstria</i> ) defoliation dynamics: the case of the 1999–2002 outbreak in northwestern Quebec |

*Continued on inside back cover / Suite au verso*

**Front cover:** Photo of a young red spruce seedling (*Picea rubens* Sarg.) in a Quebec mixedwood forest by Daniel Dumais.

**Page couverture :** Photo d'un jeune semis d'épinette rouge (*Picea rubens* Sarg.) en forêt mixte au Québec par Daniel Dumais.
