	ARTICLES	ARTICLES
Lewis Ntaimo, Julián A. Gallego Arrubla, Curt Stripling, Joshua Young, and Thomas Spencer	987–1001	A stochastic programming standard response model for wildfire initial attack planning
Yu Wei	1002–1014	Optimize landscape fuel treatment locations to create control opportunities for future fires
Walter C. Shortle, Kevin T. Smith, Jody Jellison, and Jonathan S. Schilling	1015–1024	Potential of decaying wood to restore root-available base cations in depleted forest soils
Joanne Rebbeck, Amy Scherzer, and Kurt Gottschalk	1025–1037	Do chestnut, northern red, and white oak germinant seedlings respond similarly to light treatments? II. Gas exchange and chlorophyll responses
Ameur M. Manceur, Jean Beaulieu, Liwen Han, and Pierre Dutilleul	1038–1049	A multidimensional statistical model for wood data analysis, with density estimated from CT scanning data as an example
Lawrence M. Hanks, Jocelyn G. Millar, Judith A. Mongold-Diers, Joseph C.H. Wong, Linnea R. Meier, Peter F. Reagel, and Robert F. Mitchell	1050–1059	Using blends of cerambycid beetle pheromones and host plant volatiles to simultaneously attract a diversity of cerambycid species
Chih-Da Wu, Chi-Chuan Cheng, and Yung-Chung Chuang	1060–1071	Spatial variability of evapotranspiration of old-growth cypress forest using remote sensing — a case study of Chilan Mountain cypress forest in Taiwan
Amanda F. Linnell Nemeč, Roberta Parish, and James W. Goudie	1072–1090	Modelling number, vertical distribution, and size of live branches on coniferous tree species in British Columbia

Continued on inside back cover / Suite au verso

Front cover: Photo of a young red spruce seedling (*Picea rubens* Sarg.) in a Quebec mixedwood forest by Daniel Dumais.

Page couverture : Photo d'un jeune semis d'épinette rouge (*Picea rubens* Sarg.) en forêt mixte au Québec par Daniel Dumais.

Ascelin Gordon, Brendan A. Wintle, Sarah A. Bekessy, Jennie L. Pearce, Lisa A. Venier, and Joab N. Wilson	1091–1106	The use of dynamic landscape metapopulation models for forest management: a case study of the red-backed salamander
Harmony J. Dalglish, John T. Shukle, and Robert K. Swihart	1107–1114	Weevil seed damage reduces germination and seedling growth of hybrid American chestnut
Chris Gronewold, Anthony W. D'Amato, and Brian J. Palik	1115–1125	Relationships between growth, quality, and stocking within managed old-growth northern hardwoods
P. Flisberg, B. Lidén, M. Rönqvist, and J. Selander	1126–1140	Route selection for best distances in road databases based on drivers' and customers' preferences
Colin M. Beier, Anne M. Woods, Kenneth P. Hotopp, James P. Gibbs, Myron J. Mitchell, Martin Dovčiak, Donald J. Leopold, Gregory B. Lawrence, and Blair D. Page	1141–1152	Changes in faunal and vegetation communities along a soil calcium gradient in northern hardwood forests
C.M. Preston, J.A. Trofymow, and J.R. Nault	1153–1167	Decomposition and change in N and organic composition of small-diameter Douglas-fir woody debris over 23 years
	NOTES	NOTES
Gary W. Witmer, Nathan P. Snow, Rachael S. Moulton, and Jenna L. Swartz	1168–1172	An assessment of seedling damage by wild house mice (<i>Mus musculus</i>) and wild deer mice (<i>Peromyscus</i> spp.)
I. Leal, B. Foord, C. Davis, P. de Groot, X.O. Mlonyeni, and B. Slippers	1173–1177	Distinguishing isolates of <i>Deladenus siricidicola</i> , a biological control agent of <i>Sirex noctilio</i> , from North America and the Southern Hemisphere using PCR–RFLP
William J. Orosina and Stanley J. Zarnoch	1178–1183	Response of different white fir geographic provenances to <i>Trichosporium symbioticum</i> inoculation in California
