

Canadian Journal of Forest Research

Volume 41, Number 4, April 2011

Revue canadienne de recherche forestière

Volume 41 numéro 4, avril 2011

	ARTICLES	ARTICLES
Amélie Roberge, Luc Bouthillier, and Olivier Boiral	661–668	The influence of forest certification on environmental performance: an analysis of certified companies in the province of Quebec (Canada)
Indroneil Ganguly, Ivan Eastin, and Douglas MacLachlan	669–681	An analysis of the US decking materials market: perceptual mapping approach
Jean Beaulieu, Frédéric Raulier, Guy Prigent, and Jean Bousquet	682–693	Predicting site index from climatic, edaphic, and stand structural properties for seven plantation-grown conifer species in Quebec
Rupert Seidl, Werner Rammer, and Manfred J. Lexer	694–706	Adaptation options to reduce climate change vulnerability of sustainable forest management in the Austrian Alps
Erik Mønness	707–714	The power-normal distribution: application to forest stands
Heidi Bäuerle and Arne Nothdurft	715–727	Spatial modeling of habitat trees based on line transect sampling and point pattern reconstruction
Robert L. Fleming and Allister D. Smith	728–739	Examining 40-year stand development following vegetation control: white spruce planted in a trembling aspen dominated cutover
Bonita L. McFarlane, Thomas M. Beckley, Emily Huddart-Kennedy, Solange Nadeau, and Stephen Wyatt	740–749	Public views on forest management: value orientation and forest dependency as indicators of diversity
Lauri Mehtätalo, Carlos Comas, Timo Pukkala, and Marc Palahí	750–762	Combining a predicted diameter distribution with an estimate based on a small sample of diameters

Benjamin S. Ramage, Kevin L. O'Hara, and Alison B. Forrestel	763–772	Forest transformation resulting from an exotic pathogen: regeneration and tanoak mortality in coast redwood stands affected by sudden oak death
L.J. Haavik, D.W. Stahle, and F.M. Stephen	773–781	Temporal aspects of <i>Quercus rubra</i> decline and relationship to climate in the Ozark and Ouachita Mountains, Arkansas
Matthew Diskin, Monique E. Rocca, Kellen N. Nelson, Carissa F. Aoki, and W.H. Romme	782–792	Forest developmental trajectories in mountain pine beetle disturbed forests of Rocky Mountain National Park, Colorado
Andrew Youngblood, Elizabeth Cole, and Michael Newton	793–809	Survival and growth response of white spruce stock types to site preparation in Alaska
Janet Franklin and Erin Bergman	810–821	Patterns of pine regeneration following a large, severe wildfire in the mountains of southern California
A.K. Moir, S.A.G. Leroy, and S. Helama	822–838	Role of substrate on the dendroclimatic response of Scots pine from varying elevations in northern Scotland
Ana Daría Ruiz-González and Juan Gabriel Álvarez-González	839–850	Canopy bulk density and canopy base height equations for assessing crown fire hazard in <i>Pinus radiata</i> plantations
Timo Pukkala, Erkki Lähde, Olavi Laiho, Kauko Salo, and Juha-Pekka Hotanen	851–862	A multifunctional comparison of even-aged and uneven-aged forest management in a boreal region
Mihai Tanase, Juan de la Riva, and Fernando Pérez-Cabello	863–872	Estimating burn severity at the regional level using optically based indices
	NOTES	NOTES
Dominique Gravel, Marilou Beaudet, and Christian Messier	873–880	Sapling age structure and growth series reveal a shift in recruitment dynamics of sugar maple and American beech over the last 40 years
Farrah R. Fatemi, Ruth D. Yanai, Steven P. Hamburg, Matthew A. Vadeboncoeur, Mary A. Arthur, Russell D. Briggs, and Carrie R. Levine	881–891	Allometric equations for young northern hardwoods: the importance of age-specific equations for estimating aboveground biomass
Catherine Malo and Christian Messier	892–897	Impact of primary and secondary machinery tracks on fine root growth of sugar maple after selection cutting
Timothy J. Fahey and Joel D. Blum	898–901	Litter layers (O_{ie}) as a calcium source of sugar maple seedlings in a northern hardwood forest
	CORRIGENDUM	RECTIFICATIF
Eva Ring, Staffan Jacobson, and Hans-Örjan Nohrstedt	902	Corrigendum: Soil-solution chemistry in a coniferous stand after adding wood ash and nitrogen
